

AUTOMATIC SHEET METAL FEEDING SYSTEM DOUBLE/SINGLE DECK

This compact and smart sheet metal feeding system is considered the best choice for sheet metal production lines specially for relatively small workshops, it also reduce sheet metal coils loading time and increase production's efficiency. Our automatic feeding system is demand-driven and process the right amount of material in the right order. According to customer's production needs decoilers amount ,single or double deck options are available.

Technical Details

| | | |
|-------------------------------|---|---|
| Power : | : | 2 KW for Main feeding system/ 1,00 KW for each decoiler |
| Decoilers Amount | : | 4,6,8,10 (optionally) |
| Structure type | : | Single or double deck |
| Pneumatic system | : | Yes/ 6 bar |
| Decoiler Specification | | |
| De-coiler Capacity / Type | : | 5 Ton / Motorized with sliding rails |
| Maximum Sheet Width | : | 1500mm |
| Brake System | : | None |
| Bedding | : | Bearing |
| Motor | : | Yes (0,75KW 220W 1Ph+N+PE) |
| Coil Size | : | Inside Diameter Ø508mm |
