

LOCK SEAM CLOSING MACHINE

The Lock Seam Closing Machine can quickly create seams for both outside and inside positions within seconds. It has the capability to produce ducts with diameters ranging from 100 mm to 1000 mm. By rotating the channel, you can double the working length, which significantly reduces labor costs and saves time thanks to its rapid processing capacity

Technical Details

Power	:	2,5 KW
Voltage-Frequency	:	380/400 VAC 50-60Hz 3Ph+N+PE
Current	:	6,25A
Hydraulic Unit	:	Yes 150Bar
Working Length	:	1500mm
Sheet Thickness	:	1,0mm
Seam Width	:	10mm / 13mm
Working Speed	:	16 m/min
Working Height	:	1020mm
Minimum Diameter	:	100mm
Maximum Diameter	:	Unlimited
Machine Dimensions	:	1740mm, 520mm, 1260mm
Machine Weight	:	310 Kg
