

# OVALIZER MACHINE

The Ovalizer Machine offers the capability to transform your round ducts and fittings into oval shapes, combining the airflow advantages of round ducts with space-saving benefits similar to square ducts. Its modern design aligns perfectly with the demands of the ventilation industry.

Customized molds are available for all standard diameters, allowing for versatile applications. Machine control is seamlessly managed via a user-friendly touch screen interface, while the robust hydraulic system ensures the production of high-quality, smoothly shaped oval products.

Furthermore, the machine simplifies operations by deriving the required diameter from the screen based on the minor and major measurements input, enhancing ease of use.

Groups in the machine;

- Mold Set
- Mold Hanger

Technical Details	8" - 18" Ovalizer Machine	3" - 6" Ovalizer Machine
Power :	23 KW	16 KW
Voltage-Frequency :	380/400 VAC 50-60Hz 3Ph+PE	380/400 VAC 50-60Hz 3Ph+PE
Current :	57,5A	40A
Hydraulic System :	Yes	Yes
Maximum Pressure :	160 Bar	125 Bar
Length :	3000mm	2000mm
Dies :	8" - 10" - 12" - 14" - 16" - 18"	3" - 4" - 5" - 6"
Optional Dies :	5" - 6" / 20" - 36"	-
